CED HARVEY MARCOS

Cavite City, Philippines

PROFESSIONAL SUMMARY

AWS certified backend Engineer proficient in Python, Node.js, and cloud-native architectures, with strong expertise in AWS services, serverless solutions, and scalable API development.

EDUCATION

Saint Gregory College of Science and Technology   March 2017

Bachelor of Science, Computer Science

RELEVANT EXPERIENCE

Upwork, Remote   Mar 2025 - Present

Freelancer

- Freelance Backend Developer specializing in Python, Node.js, and AWS, delivering secure, scalable, and high-performance cloud-native solutions for clients worldwide.

Codev, Cebu, Philippines   Feb 2021 - Feb 2025

Senior AWS Backend Developer

- Design and implementation of cloud-native architectures on AWS, leveraging Lambda, API Gateway, S3, RDS, and DynamoDB to build secure, scalable applications.
- Championed serverless solutions and microservices, reducing infrastructure costs and improving system reliability.
- Applied AWS best practices in security, monitoring, and automation, ensuring high performance and maintainability.

ProSource, Makati, Philippines   Sep 2019 - Dec 2020

Backend Developer

- Designed and developed scalable backend services using Python (FastAPI, Django) and Node.js (Express.js, NestJS) across multiple client projects.
- Built and optimized RESTful APIs and microservices, enabling seamless integration with frontend and third-party systems.
- Implemented database solutions with PostgreSQL, MySQL, and MongoDB, ensuring reliability and performance for high-traffic applications.

Kalibrr, Makati, Philippines   Sep 2018 - Apr 2019

Junior Web Developer

- Contributed to frontend development using React, implementing responsive UI components and improving user experience.
- Collaborated with senior developers to maintain and enhance web applications, ensuring code quality and performance.
- Expanded into backend development with Flask, assisting in building and integrating RESTful APIs.

SKILLS

Python, Node, Amazon Web Services (AWS), Serverless Infrastructure, Docker, Git, DevOps

---

CERTIFICATES

AWS Serverless, AWS Security Champion issed by Amazon Web Services Training and Certification
